

CIVIL ENGINEER STEELWORK (M/F/D)

With our headquarters in Marchtrenk and units in Europe, America and Asia, we develop and implement highly automated material handling solutions all around the world. TGW stands for international teamwork and growth. Today, about 3,700 committed employees work responsibly and are living logistics.

As a part of our Steelwork team, you will be responsible for the design engineering and calculation of our racking systems. With your expert knowledge, you will develop optimum storage solutions for our customers, maximising the order intakes by means of a sophisticated price-benefit ratio.

WHAT YOU'LL BE HANDLING

- Design engineering and dimensioning of our high-bay warehouses and steelwork platforms
- Development of optimum solutions and professional consulting of internal and external customers regarding project-specific topics
- Quote calculation and statement of costs of competitive and feasible projects according to schedule while working closely with the Key Account Management
- Calculation of foundation loads and preparation of structural analysis during the sales phase
- Continuous consultation with the Sales and Purchasing departments as well as our international units

WHAT YOU'LL NEED

- Completed technical education with focus on Structural Engineering or Mechanical Engineering and at least 3 years of job experience in technical sales (preferably in industrial steelwork or machine engineering) **or** completed university education with a focus on Civil Engineering (job experience in a similar field of advantage)
- Excellent command of German and English
- Profound knowledge of structural engineering and calculation desirable
- Holistic thinking, customer orientation and cost consciousness
- Solution-oriented method of working and excellent communication skills

WHAT YOU'LL RECEIVE

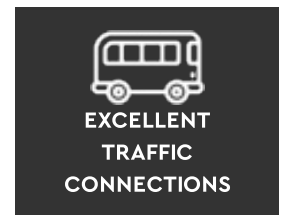

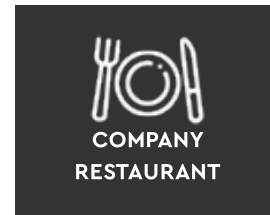

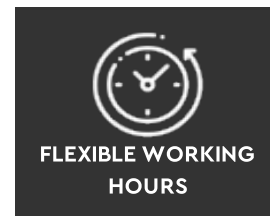

- A job in a successful international company with a strong focus on culture and values
- Stable, foundation-owned company, 100% privately owned
- A cooperative work environment with a lot of room for creativity
- A well-structured training period, support by experienced colleagues and flexible working hours
- Flat hierarchies, short decision-making processes and lots of other social benefits

The minimum annual gross pay for this position is 38,397 Euros according to the collective agreement. A possible overpay depends on your individual job experience and qualification.

Use your know-how and skills for an exciting job and start your career in a diversified field of responsibility in an international network for automated logistics technology.
