

TGW Logistics with record-breaking order intake

- The intralogistics specialist's order intake climbed by 55 percent and reached more than 1.5 billion for the first time in the company's history.
- Revenue rose slightly to 1.07 billion euros during the 2024/25 business year.
- Significantly improved EBIT of 49.3 million euros thanks to the successful transformation program.

(Marchtrenk, Austria, October 24, 2025) Despite challenging economic conditions, the intralogistics specialist TGW Logistics brought the 2024/2025 business year (July 1, 2024 to June 30, 2025) to a record-breaking close. At 1.07 billion, the revenue of the technology company – which plans and realizes highly automated logistics centers for its international customers and supports them during live operation – slightly exceeded the previous year's all-time high. The earnings before interest and taxes (EBIT) rose significantly to 49.3 million euros, and the number of employees grew to 4,645.

"Our order intake has risen by 55 percent to 1.5 billion euros – the highest it's been in our company's history. That ensures our capacity utilization in the coming months in both production and realization. The operating result (EBIT) also experienced a significant upward trend: at 49.3 million, it increased 66 percent compared to last year. We are seeing the positive effects of the transformation program, which we successfully completed in the summer of 2025," affirms **Henry Puhl**, Chief Executive Officer at TGW Logistics.

Business Year	2023/2024 July 1, 2023 to June 30, 2024	2024/2025 July 1, 2024 to June 30, 2025	
Order intake (MEUR)	970.8	1,509.1	+ 55.4 %
Revenue (MEUR)	1,068.7	1,069.9	+ 0.11 %
EBIT (MEUR)	29.6	49.3	+ 66.5 %
EBIT Margin	2.7 %	4.6 %	
EBITEP* (MEUR)	29.6	54.8	+ 85.1 %
Dual Employee Part. (MEUR)	-	5.5	
Employees	4,497	4,645	+ 3.2 %
R&D (MEUR)	54.1	52.8	

52 million euros for the technology of tomorrow

Investments in research and development amounted to 52.8 million euros, corresponding to 4.9 percent of the revenue. Innovation has been an integral part of the company's DNA since its founding in 1969. At present, particular focus is on mobile and stationary robotics, artificial intelligence and the possibility of digitalization. Medium-sized companies and global players alike put their trust in TGW Logistics' expertise: during the 2024/25 business year, these included home appliance specialist BSH Hausgeräte, healthcare supplier OneMed and spare parts expert AUTODOC.

Dual Employee Participation

For the 2024/25 business year, TGW Logistics will be distributing 5.5 million euros in the form of dual employee participation – the sixth time it has done so. *"In the interest of transparency and fairness, each employee will receive the same base amount. No matter whether they work in Austria, the USA or China and no matter their function,"* emphasizes **Henry Puhl**. *"The fact that our employees can participate in our success is a central element in our foundation philosophy."*

What's more, as a foundation-owned company, TGW Logistics cannot be sold and is a stable business partner as well as a reliable employer. Two-thirds of its profits remain within the company and are invested. The other third goes to the owner, the TGW Future Private Foundation, which in turn uses at least 30 percent of that to support the charitable projects of TGW Future Wings. Those projects focus on the comprehensive personal development of children and young people.

Expansion of the headquarters on schedule

The expansion of the TGW headquarters in Marchtrenk (Austria) was launched in September 2024. Now the construction progress is clearly visible and the showcase project continues on schedule. *"By the summer of 2026, we will have constructed a 16,000 m² production hall and a highly-automated storage system, laying the foundation for our planned growth over the coming years. We are investing a total of roughly 100 million euros",* according to **Sebastian Wolf**, Chief Financial Officer at TGW Logistics. *"This constitutes not only a strong affirmation of the potential of intralogistics, but also and above all of this location."*

About TGW Logistics:

TGW Logistics is one of the leading international suppliers of material handling solutions. For over 50 years, the Austrian specialist has implemented highly automated systems for customers, including brands from A as in Adidas to Z as in Zalando. As systems integrator, TGW Logistics plans, produces, implements and services complex logistics centers – from mechatronic products and robots to control systems and software.

TGW Logistics has subsidiaries in Europe, Asia and the US and employs more than 4,600 people worldwide. In the 2024/25 business year, the company generated a revenue of 1.07 billion euros.
