

SOFTWARE DEVELOPER C# FOR PRODUCTION TOOLCHAIN (M/F/D)

TGW is an internationally leading systems integrator in the area of intralogistics with more than 3,700 employees worldwide. For our customers in the core industries of Fashion & Textile, Grocery and Industrial & Consumer Goods, we plan and implement highly automated solutions.

We are currently looking for a creative software developer for our Productional Software Development team. You have a passion for programming, like finding solutions and are excited about working in a diversified field of responsibility? Then this job might be of interest to you: You will be developing, programming and implementing software solutions for an ideal illustration of the business processes along our production toolchain. In this department, you will be working on groundbreaking new projects and will be greatly contributing to an increase in our productivity and quality.

WHAT YOU'LL BE HANDLING

- Development of software solutions along our production toolchain (e.g. CAD, calculation tools etc.) in close collaboration with the Solution Architect and the Product Owner
- Technical specification with internal key users and programming of the derived software and services in C#
- Parametrisation and configuration as well as integration of software with other systems (e.g. SAP)
- Commissioning and testing of the prototype software to ensure software quality
- User trainings, documentation and 2nd level support

WHAT YOU'LL NEED

- Completed technical education in the field of IT or Software Development (Higher Technical School, University/University of Applied Sciences)
- Excellent knowledge of object-oriented programming (ideally in C#)
- Basic skills in the fields of Software Architecture, Software Design and relational databases desirable
- Excellent command of written and spoken German and English
- Independent and structured way of working as well as high ability to work in a team and high customer orientation

WHAT YOU'LL RECEIVE

- A job in a successful, international and foundation-owned company with a strong focus on culture and values
- An appreciative working environment and Flex Time
- Openness for new ideas as well as numerous benefits
- A well-structured training period and support by experienced colleagues
- Flat hierarchies, short decision making processes and a high degree of initiative

The minimum annual gross pay for this position is 37,556 Euros according to the collective agreement. A possible overpay depends on your individual job experience and qualification.

	Type de contrat de travail	à temps plein
	Catégorie	Développement / Logiciel / TI
	Lieu de l'emploi	Wels, Upper Austria
