

APPLICATION ENGINEER (M/F/D)

You will work closely with the responsible Key Account Manager in designing material handling solutions for our customers, contributing to a maximised order intake by means of optimum price-benefit ratios. After an intensive learning and training phase, there will be exciting challenges waiting for you.

WHAT YOU'LL BE HANDLING

- Engineering of material handling solutions in due consideration of technical feasibility and optimised production cost
- Creation of system layouts
- Calculation and preparation of quotes
- Technical support to Key Account Managers and customers in the solution development process
- Calculation of equipment performance rates
- Collaboration in the development of the Applications Engineering process

WHAT YOU'LL NEED

- Completed HTL (Higher Technical College) education in the field of automation engineering, mechatronics or similar education with two or more years of experience in technical solution design
or
- University degree in the same fields
- Very good command of English, CAD knowledge (e.g. AutoCAD)
- Ability to work in a team, reliability, customer orientation and excellent communication skills
- High willingness to learn and flexibility
- Accurate, independent and systematic way of working

WHAT YOU'LL RECEIVE

The minimum annual gross pay for this position is 33,813 Euros. A possible overpay depends on your individual job experience and qualification. Furthermore, we offer flexible working hours, a cooperative working environment with attractive benefits and exciting perspectives.

Use your know-how and skills for an exciting job and start your career in a diversified field of responsibility in an international network for automated logistics technology.

Living Logistics. Promoting Careers.

TGW is an employer that promotes equal opportunities. We invite everybody interested in this job to apply.
