

Project Manager (m/f) Software

We develop and realize highly complex intralogistics projects for international customers from different industries. As a Project Manager (m/f) Software, you are responsible for the software part of the projects and for the technical and economic result. You will be supported by a team of specialists.

Meet your new challenge in Teunz, Regensburg, Stephanskirchen near Rosenheim or Langen near Frankfurt.

TASKS

- As a Project Manager (m/f) Software you are responsible for our software projects during the entire project period from order intake to approval by the customer
- You transform the business requirements into technical requirements documents (Requirements Engineering)
- As a Project Manager (m/f) you plan and control the agile project implementation according to Scrum
- You monitor the development progress (technology, costs and deadlines) of the project and report the current status regularly to various management levels
- You act as the contact person to our customers and to our internal and external partners

REQUIREMENTS

- Several years of professional experience in the management of software projects and software development, ideally in the field of logistics
- Ideally experience in software engineering methods, requirements engineering, agile software development (eg Kanban, Scrum, XP)
- Team player with fun in dealing with people
- Conflict ability, diplomatic skill and a good assertiveness
- Willingness to travel abroad and a very good command of German and English

WHAT WE OFFER

- Permanent employment with attractive salary in a family-friendly company with flexible working hours
- Secure job in a growth market
- Structured onboarding concept and support from experienced colleagues
- Collegial working environment and a large freedom of action
- Staff restaurant, free fruit, employee discounts and much more
- Individual opportunities for further development through structured personnel development
