

IOT DEVELOPER (M/F/D)

With our headquarters in Marchtrenk and units in Europe, America and Asia, we develop and implement highly automated material handling solutions all around the world. TGW stands for international teamwork and growth. Today, about 3,700 committed employees work responsibly and are living logistics.

In order to continue our growth and ideally react to market requirements concerning digitalisation, we are looking for an experienced IoT (Internet of Things) developer. As a part of the two-member system architecture team, you will be responsible for developing applications for recording data of our products. Besides defining the data together with the respective product expert, you will work out mechanisms to process the data and provide them using a cloud application. This involves creating a path-breaking IoT infrastructure within the TGW group, which means that you will make an important contribution to intralogistics' progress in terms of digitalisation.

TASKS

- Development, maintenance and standardisation of applications for recording and processing data of our mechatronic standard products
- Linking the data recording to a cloud application
- Creation, establishment and subsequent maintenance of an extensive, innovative IoT management infrastructure
- Further development of the IoT capabilities of the existing products
- Collaboration in new developments for defining future IoT requirements and digitalisation applications

REQUIREMENTS

- Completed HTL (Higher Technical College) education (computer science, information technology, automation engineering etc.) with at least 5 years of relevant job experience or completed university/FH education (with the same specialisations), job experience desirable
- Well-founded Linux and solid network technology/configuration knowledge
- Experience with web technologies such as Javascript or HTML, basic know-how in high-level language and PLC programming is an advantage
- Excellent command of written and spoken German and English
- Excellent analytical skills, reliability and sense of responsibility

WE OFFER

The minimum annual gross pay for this position is 41,453 Euros according to the collective agreement. A possible overpay depends on your individual job experience and qualification.

Furthermore, we offer flexible working hours, a cooperative working environment with attractive benefits and exciting perspectives.

Use your know-how and skills for an exciting job and start your career in a diversified field of responsibility in an international network for automated logistics technology.

Living Logistics. Promoting Careers.
