

INSTALLATION SUPERVISOR (M/F/D)

Thanks to our continuous growth we are looking for open-minded and committed people, who have already gained experience in international plant engineering, to strengthen our existing installation team. In this function you will be working all over the world for TGW. You will be responsible for the entire on-site installation of our material handling and storage equipment, supporting the commissioning of TGW sites.

WHAT YOU'LL BE HANDLING

- Evaluation of the construction site regarding safety
- Supervision of all-inclusive and directed installations and leadership of employees on-site
- Responsibility for the adherence to deadlines and quality, from start of installation to acceptance of the site
- Interface between TGW / customer and the general contractor
- Responsibility for the adherence to the valid process and work instructions
- Coordination of subcontractors on-site
- Holding training sessions for the specialised personnel of the system operator

WHAT YOU'LL NEED

- Successfully completed mechanical or electrical education and training
- Experience in installation of logistics systems (material handling system, storage systems, racks, etc.) and/or experience in international plant engineering of advantage
- Basic knowledge in the fields of electrical and controls engineering desirable
- Willingness to travel abroad (100 %) and good command of English and German
- Good computer literacy (MS Office, AutoCAD)
- Class B driver's licence is prerequisite, forklift truck licence of advantage
- Self-dependent and responsible way of working

WHAT YOU'LL RECEIVE

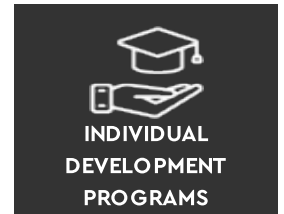

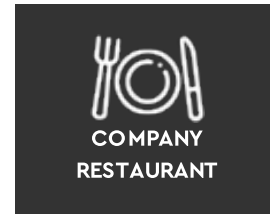

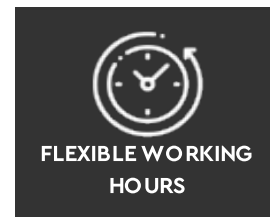

The minimum annual gross pay for this position is 31.988,00 Euros. A possible overpay depends on your individual job experience and qualification.

Furthermore, we offer a cooperative working environment with attractive benefits and exciting perspectives.

Living Logistics. Promoting Careers.
